

# Nature vocabulary: six English picture cards

## Pupil cards and task

Six cards pair a word, a picture, a short definition and an example sentence.

Cut along the dashed borders. Single-sided cards; 4 mm spacing between cards.

### sun

The star that gives Earth light and heat.

The sun is bright.

### moon

The natural object that travels around Earth.

I can see the moon.

### star

A bright object in space that gives off its own light.

A star shines in the night sky.

### rain

Drops of water that fall from clouds.

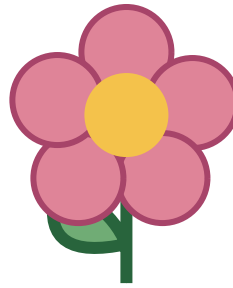

The rain makes the path wet.

### leaf

A flat part of a plant that usually helps it make food.

The leaf is green.

### flower

A part of a flowering plant that can help it make seeds.

The flower has petals.

## Use the cards

Choose two or three words. Say a word, point to the picture and invite pupils to identify it or use it in a sentence. Ask what the picture helps us notice and what it leaves out. Keep the cards whole for display, or have an adult prepare any cut cards.

This English example is a separate language variant. It does not establish the availability or accuracy of the Mandarin characters and Pinyin named in the source brief.
