

The water cycle

Learn the words in three languages.

NAME _____

CLASS _____

DATE _____

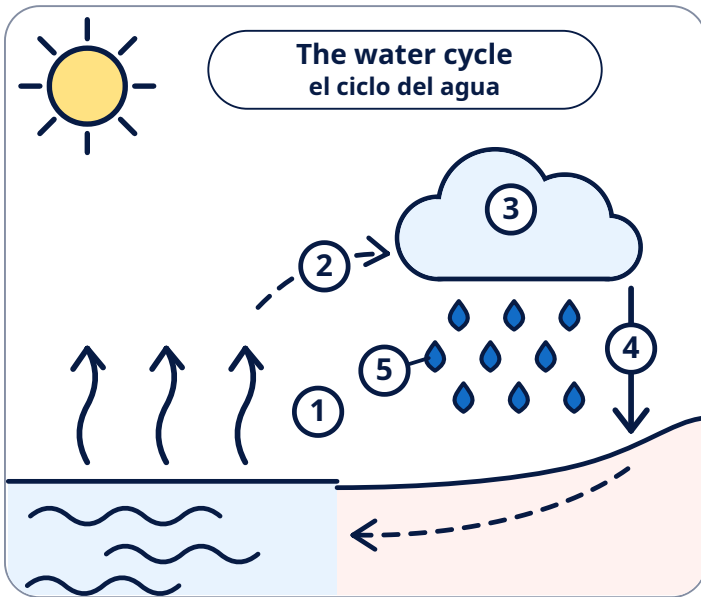

LEARNING GOAL

Know five water cycle words in English and Spanish, and show them in your own language.

SUCCESS CRITERIA

- ☐ I can find the five numbered parts on the picture.
- ☐ I can say each word in English and Spanish.

Find each number on the picture. Read the words. Then write or sketch the idea.

Sketch it

1 evaporation la evaporación

Water turns into vapour and rises.

In my home language

Sketch it

2 condensation la condensación

Vapour cools and turns into tiny drops.

In my home language

Sketch it

4 precipitation la precipitación

Water falls from clouds to the ground.

In my home language

Sketch it

3 cloud la nube

Tiny drops of water float in the sky.

In my home language

Sketch it

5 rain la lluvia

Drops of liquid water that fall.

In my home language

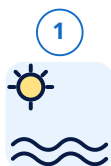

Your language counts. Write in any language or script, or just draw. You do not have to share.

① Three languages, one idea

4 sentences

Read both aloud. Then write it in your home language, or draw it.

ENGLISH

The sun warms the water.

SPANISH

El sol calienta el agua.

In my home language (or draw it)

ENGLISH

Water from the sea evaporates.

SPANISH

El agua del mar se evapora.

In my home language (or draw it)

ENGLISH

Clouds form.

SPANISH

Las nubes se forman.

In my home language (or draw it)

ENGLISH

Rain falls.

SPANISH

La lluvia cae.

In my home language (or draw it)

② How are they connected?

2 links

Pick a word from the bank. Write it on the dashed line, then write a sentence in any language.

Word bank

becomes

makes

falls as

warms

the sun

choose a word

the sea

water vapour

choose a word

a cloud

GO FURTHER

Link two other parts of the water cycle with a word from the bank.
